PROFESSIONAL SUMMARY

Result-driven Senior Software Engineer with years of experience building scalable fintech, healthcare, and enterprise software solutions. Experienced in ASP.NET Core, Angular, Python, cloud technologies, and Agile development practices. Proven ability to deliver end-to-end applications, collaborate with distributed teams, contribute to sprint-based development. Evolving expertise in Microsoft suite and AutoGen framework integration.

WORK EXPERIENCE

FiveRivers Technologies.

Senior Software Engineer

Lahore, PK
July 2025 – Present

- Contributed to a US-based supply chain platform using ASP.NET Core, Angular, and SQL Server.
- Delivered features and enhancements in Agile sprints, collaborating with developers, QA, and business stakeholders.
- Developed and maintained scalable APIs and backend services while ensuring code quality and performance.

Emerssive.

.NET Consultant

Remote
July 2025 – Feb 2026

- Delivered production-grade healthcare billing application using ASP.NET Core Web API, Dapper, MS SQL Server, Azure Web Services, processing **1,000s of patient payment transactions daily** with **99.9% uptime** and sub-second response times
- Integrated healthcare data workflows with Mirth Connect and HL7 DFT, collaborated closely with business teams to refine requirements and ensure smooth delivery and designed scalable API architectures, optimized database performance.
- Led cross-functional requirement gathering and delivered custom SSRS reports, translating business needs into technical specifications with **100%** sprint commitment delivery.

Fintechtik.

Software Engineering

Lahore, PK
Dec 2023 – July 2025

- Developed and maintained core features for multi-region fintech platform serving UK and Ghana markets using ASP.NET Core Angular, and Oracle Database with ADO.NET, processing **10,000+ daily bill generations** and member invitations while **reducing critical production issues by 40%** through rigorous testing and code optimization
- Collaborated with senior engineering leadership to debug complex issues, implementing SOLID principles and clean code practices across full-stack architecture while leveraging AWS services (EC2, S3) for scalable cloud infrastructure and storage
- Delivered features in Agile sprints with **95% velocity**, utilizing ASP.NET Core Web API, Flask, Angular, Oracle/MySQL databases, and Git workflows to ensure timely releases and seamless cross-team collaboration

EDUCATION

MINHAJ UNIVERSITY LAHORE

BS in Computer Science

CGPA: **3.46/4.0**

Lahore, PK

PROJECTS

Mojo Bills

SaaS billing platform for Ghana organizations. Developed billing APIs, recurring payment logic, email notifications, and reporting modules using ASP.NET Core, Angular, ADO.NET, and Oracle with optimized stored procedures.

Merchant On-boarding

Led team of 3 developers to build merchant on-boarding module for Inter-pay Ghana. Developed RESTful APIs using ASP.NET Core and Angular frontend, streamlining merchant activation process for Ghana's digital payment ecosystem.

Lead Gen Helper

Developed AI-driven proposal automation platform integrating OpenAI GPT, RAG pipeline, and Upwork API. Implemented user authentication, RBAC, job feed parsing, and intelligent cover letter generation reducing job **application time by 70%** and client- sales team **communication time by 50%**.

NutriCare

Built full-stack nutrition platform using Django, MySQL, and LLM integration. Implemented AI chatbot for dietary guidance, online consultation booking, e-commerce module for supplements, personalized diet plans, and food nutrient checker

ADDITIONAL

Technical Skills: ASP.NET Core, C#, Python, ADO.NET, Web API, Dapper, Entity Framework Core, Ionic, SSRS, MS SQL Server, MySQL, Oracle Database, Django, Flask, Angular, HTML/CSS, Git, LangChain

Tools: Git & GitHub, AWS EC2, S3 Bucket, CodeCommit, Docker, Visual Studio 2022, Cursor AI, MCP, Azure DevOps & Web Service, Github Actions CI/CD

Soft Skills: Adaptability to New Technologies, Quick Learner, Team Leadership, Code Review & Knowledge Sharing, Continuous Improvement Mindset

Languages: English, Urdu, Punjabi.

Certifications & Training: Microsoft Back-End Developer Professional Certificate, Back-end Development from Nexskills, Google Python Crash Course, Vibe Coding with Cursor AI, Linux Essential by cisco.

Awards: Best intern at Bytewise; Won 1st & 2nd positions in speed programming 2021 & 2023 respectively intra-university competition.
